

SAI LAXMA REDDY R

Hyderabad, India | +91 9014726652 | sailaxmareddy07@gmail.com
linkedin.com/sai-laxma-reddy | github.com/Sai7724

OBJECTIVE

Motivated B.Tech graduate specializing in Data Science and AI with hands-on experience in Python development, machine learning, and full-stack web applications. Skilled in building scalable REST APIs using Flask and Django, with a strong foundation in code optimization, unit testing, and software design principles. Seeking a Python Developer role to design, develop, and maintain Python-based applications across the full SDLC, contributing clean, well-documented solutions in an agile team environment.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, SQL, HTML, CSS
- **Python Frameworks:** Flask, Django, FastAPI
- **Backend Technologies:** Node JS, Express JS
- **API Development:** REST full API
- **Database:** MONGODB, PostgreSQL, SQLite
- **Frontend:** HTML5, CSS3, Bootstrap, React, UI/UX Design
- **Tools & Platform:** Git GitHub, Postman, Figma, VS Code, Cursor, Docker
- **Testing and Quality:** Unit Testing, pytest, Code Review, Debugging
- **Soft Skills:** Code Review, Debugging, Performance Optimization, Agile Development

EXPERIENCE

Front-End Software Engineering Intern - Skyscanner

Dec - Jan 2025 - 26

- Built a production-quality travel date picker component in React.js using Skyscanner's open-source Backpack design system, integrated into a live web application.
- Customized reusable UI components and ran automated test suites to validate rendering, accessibility, and edge-case behavior across screen sizes.
- Followed industry-standard front-end engineering practices including component-based architecture, Git version control, and code review workflows.

Data Analyst Intern - BIVA Analytics

April - May 2026

- Designed end-to-end source-to-target data mappings across 10+ ecommerce and marketplace platforms (Shopify, GA4, Amazon, Flipkart, Myntra), powering analytics-ready datasets for downstream BI.
- Authored complex SQL queries on Trino-based retail POS systems to surface insights on store performance, return rates, and revenue leakage.
- Built ER diagrams across 23+ entity tables and enforced schema governance, identifying critical data quality issues in production mappings before they impacted reporting.

PROJECTS

AceMock - AI-Powered Interview Preparation Platform

Sep – Dec 2025

React.js, Node.js, Express.js, REST APIs, LLM Integration

- Architected and shipped a full-stack interview platform featuring a 6-stage interview workflow with real-time scoring, candidate state management, and AI-driven feedback delivered via RESTful API endpoints.
- Integrated LLM APIs to deliver contextual, personalized assessments that simulate real interview scenarios with responsive UI/UX across desktop and mobile.

SiteSafe - Privacy Threat Analyzer

Nov – Dec 2025

Python, Flask, BeautifulSoup, spaCy, Transformers, PyTorch, REST APIs

- Engineered a Python/Flask web application that automates website privacy auditing through HTTPS validation, tracker detection, and policy summarization.
- Built an NLP pipeline with spaCy and HuggingFace Transformers to classify privacy policies into Low/Moderate/High risk categories, achieving ~90% classification accuracy.
- Designed a REST API and proprietary privacy scoring algorithm to generate comprehensive security assessments.

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science & Engineering - Dr. M.G.R. University, Chennai | CGPA: 7.42 | *Graduating 2026*
